

Science & Technology Facilities Council

ISIS Neutron and Muon Source

ISIS Neutron and Muon Source is a world-leading centre for multidisciplinary research at the Rutherford Appleton Laboratory near Oxford. Funded by the UK's Science and Technology Facilities Council, our suite of over 30 neutron and muon instruments give unique insights into the properties of materials on the atomic scale.

- Over 2500 user visits a year, covering physical, life, environmental, engineering sciences, cultural heritage and fundamental research
- Extensive expertise and user support
- An active industrial engagement programme
- Developing the skills of the user community with over 550 PhD students visiting each year
