

SINE2020

Science and Innovation with Neutrons in Europe 2020

SINE2020 is a consortium of 18 partner institutions from 12 countries. The new project started on October 1st and will last for four years with a 12M EUR budget. It is funded by the European Union through the H2020 programme.

It has two objectives:

- Preparing Europe for the unique opportunities at the European Spallation Source (ESS) in 2020
- Developing the innovation potential of neutron Large Scale Facilities

Work will focus on:

- Instrumentation: e-tools & detectors
- Data treatment & Software
- Industry consultancy
- Training & Outreach: e-learning, schools
- Sample preparation: chemical deuteration, crystal growth
- Sample environment
