# MATRAC 1 – Summer School 2018

## Application of Neutrons and Synchrotron Radiation in Engineering Materials Science

Lectures on all relevant methods to provide a systematic overview of the application of neutrons and synchrotron radiation to the structural analysis of engineering materials. Three-day theoretical training and two days of hands-on experience with the instruments at DESY in Hamburg. The course is designated for students and young scientists from research and industry from all over Europe.

2-7 September 2018 / Lauenburg & Hamburg
